

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

- 1-25. (canceled)
26. (currently amended) A medicament delivery device comprising:
a medicament reservoir;
an inhalation passage; and
a metering member, provided with at least one dispensing cup, adapted to transfer a measured dose of medicament from the medicament reservoir to a medicament delivery position;
wherein the metering member comprises a medicament dispensing member and a medicament measuring member associated therewith, said medicament ~~dispensing~~ measuring member being provided with at least one measuring chamber for transferring medicament from the reservoir to the dispensing cup,
the arrangement being such that the metering member can be moved from a ~~first measuring~~ position, in which medicament is transferred from the reservoir to the measuring chamber, to a ~~second~~ medicament transfer position, in which medicament is transferred from the measuring chamber to the dispensing cup, and to a ~~third position in which medicament is delivered to the~~ medicament delivery position and wherein the dispensing cup is provided with an air duct.
27. (previously presented) A medicament delivery device according to claim 26, characterized in that the device is provided with a moisture proof barrier.
28. (previously presented) The delivery device according to claim 26 or 27 wherein said metering member comprises a moisture resistant sleeve.
29. (previously presented) The delivery device according to claim 28 wherein at least one aperture in said sleeve provides said at least one measuring chamber.

30. (currently amended) An inhaler comprising:
a medicament reservoir;
an inhalation passage; and
a metering member, provided with at least one dispensing cup, adapted to transfer a measured dose of medicament from the medicament reservoir to a medicament delivery position;
wherein the metering member comprises a medicament dispensing member and a medicament measuring member associated therewith, said medicament ~~dispensing~~ measuring member being provided with at least one measuring chamber for transferring medicament from the reservoir to said dispensing cup,
the arrangement being such that the metering member can be moved from a ~~first~~ measuring position, in which medicament is transferred from the reservoir to the measuring chamber, to a ~~second~~ medicament transfer position, in which medicament is transferred from the measuring chamber to the dispensing cup, and to a ~~third position which medicament is delivered to the~~ medicament delivery position; and
wherein the dispensing cup is provided with a duct to ~~allow air to be sucked through the metering member upon inhalation by a patient~~ provide a flow of air through the cup and into the inhalation passage upon operation of the inhaler.

31. (currently amended) An inhaler according to claim [[28]] 30 characterized in that the metering member comprises an outer sleeve and a dispensing member.
